Before

After Roof Reviver

The Company

Roof Reviver is manufactured in Brisbane by Flexitech Pty Ltd, a wholly Australian owned company specialising in environmentally friendly Architectural and Decorative coatings, adhesives and paints.

The Product

Roof Reviver is a premium heavy duty roof coating system designed for industrial, commercial and domestic roofs. It is environmentally friendly and restores your roof to its former glory thereby protecting and adding value of your home.

Roof Reviver provides long lasting protection, is UV stabilised, and comes in a Full Gloss or Satin finish that will not crack, peel or blister with age to greatly enhance the appearance of your home.

Roof Reviver has a range of products to restore and redecorate all kinds of roofing surfaces including;

- * cement roof tiles
- * fibro sheeting (including Asbestos)
- * sheet metal, Colourbond & Zinalume

Where Roof Reviver is applied by an Accredited Applicator, it comes with a 10 year product and workmanship warranty.

The Restoration Process

Rework: Repair and replace broken tiles and dislodged ridgecaps.

Cleaning: High Pressure Water Blasting to remove moss, dirt & lichen.

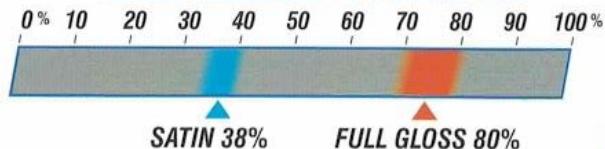

Prime: Apply Primer or Hi-Build Primer to form the base foundation.

Base: Apply Roof Reviver finish coat in the selected colour.
